Circle of Plagues

Contributed by [Samantha Leff](#)

Source: Original

Up to ten people can play this game

Step 1: Each person represents a plague and picks an action that will represent their plague (Example: I pick frogs then proceeds to jump like a frog).

Step 2: One person is encircled by all the other members.

Step 3: A circle member is chosen to start and they must do their symbol and then do some other circle member's symbol. The person whose symbol it is must do their symbol and someone else's before the person in the center touches them.

Step 4: If someone in the circle symbolizes the person in the center or is tapped, they switch places with the person in the center.
