

A symbol of Hope

Contributed by [Erica Berkowitz](#)

Source: original

Matzah. It's flat, it has holes in it, it breaks easily, it crumbles, it's bitter, and it's nothing creative, yet Jewish people and Non-Jewish people that observe Passover eat it every day for at least 8 days out of the year. Sometimes more.

"Something second hand and broken, still can make a pretty sound, and that second hand white baby grand still has something beautiful to give." Megan Hilty

Every year we look at Matzah like it's nothing special. But it represents something more than a large bland cracker. It represents hope. Matzah still has a beautiful lesson to teach us, and even though the Matzah in front of us is broken, it still has a beautiful story to tell.
