What needs to change so the world as it is can wake up?

What needs to change so the world as it is can love us?

What needs to change right now so we can breathe?

What needs to change so our sisters and brothers can be as free as we are?

And what needs to change so that we can be free too?

What needs to change in our voices, our postures, our pacing?

What needs to change in how we try to change our bodies?

What needs to change in our newspapers and in our budgets?

What needs to change in our language and in our bedrooms?

What needs to change in how we look in the mirror?

...

What needs to change so that I have a voice and you have ears?

I know what needs to change and you know what needs to change and we will be the change.
