"I marched in a snowstorm in Stanley, Idaho (pop. 63) with 29 other people comprising half the town. I carried a handmade sign that said "One Small Voice" because I've never stopped believing that one small voice plus millions of other small voices is exactly how we change the world. I'm making the updated recording of "One Small Voice" available to everyone because it will take the strength and persistence of many small voices to overcome the lies of the loudest voice with our message of truth, dignity, and decency."
