Infinity Stone Dayenu by Deborah Missel and Esther Kustanowitz

How lucky we have been to have been gifted memorable moments with Earth's mightiest heroes! If the Marvel Cinematic Universe had done but one of these kindnesses, it would have been enough (and more than we deserved!) – Dayenu!

If Captain America had retrieved the Tesseract and defeated Red Skull, it would have been enough.

If Thor had saved the Nine Realms and protected the Reality Stone, it would have been enough.

If Peter Quill and the Guardians of the Galaxy had won the Power Stone in a dance-off, it would have been enough.

If Doctor Strange had mastered the Time Stone, it would have been enough.

If the Avengers had used the Mind Stone to destroy Ultron and create Vision, it would have been enough.

If the Avengers had suited up and searched all of time and space for the Infinity Stones, it would have been enough.

If the Avengers had assembled against the odds to fight Thanos, it would have been enough.

If Black Widow had sacrificed herself for the Soul Stone, it would have been enough.*

If Ant-Man had become large, then small, then a baby, then an old man, then back to regular Scott Lang, it would have been enough.

If there had been an Endgame time heist that allowed Steve Rogers a second chance at love, it would have been enough.

If Tony Stark had just said, I love you 3000, it would have been enough.

*(actually maybe this was too much, but we did get a Black Widow movie after...)
