

## The Four Children

Contributed by [Tzedek: Jewish Action for Modern World](#)

Source: Religious Action Center

A discussion can take place regarding with which of the four children each guest identifies most, followed by a consideration of which populations are currently "unable to ask," who might be considered "simple," and more. Examples for a new set of four children may include: One who sees the pain of others and works to relieve suffering. One who cares only about him/herself. One who cares only about other Jews but not other populations. One who doesn't know where to begin.
